

## Egalamine FA

Leveling Agent with affinity for the dyestuffs

### Features:

**Egalamine FA** is a medium viscous liquid slightly yellowish, can be diluted with water in all proportions to give a neutral solution.

### Chemical Composition:

Synergetic preparation of anionic/ non-ionic surfactants.

### Characteristics:

- Good stability to acids, alkalis in their diluted form.
- Good wetting effect.
- In view of its excellent leveling effect and good detergency can therefore be employed for dyeing and cleansing in one bath.
- Improves dye diffusion and thus levelness.
- Compatible with anionic and nonionic products, not compatible with cationic products.
- Biodegradable.
- Moderate foam.

### Applications:

#### Egalamine FA is used:

- As leveling and dispersing for dyestuffs.
- For wetting and precleansing of all types of textile goods.
- As protective colloid for the prevention of lime-soap precipitations in hard water.

### Amount to be used

**Egalamine FA** can be diluted with cold or warm water at a concentration of: 1 - 2 g/L at a liquor ratio of 1:10

### Storage

**Egalamine FA** is stable for 1 year when properly stored in closed containers at 20°C. Avoid direct sunlight and elevated temperatures.
