

## **Lipol 610**

### Washing and wetting Agent

#### **Features :**

**Lipol 610** is a medium viscous liquid slightly yellowish that can be diluted with warm or cold water in all proportions to give a neutral solution.

#### **Chemical Composition:**

Blend of anionic/non-ionic surfactants and additives to increase the performance of its washing and wetting properties.

#### **Characteristics :**

- Good stability to diluted acids and alkalis.
- Good scouring and cleansing action in all stages of processing for cotton and its blends, also for wool and synthetic fabrics.
- Good emulsifying and wetting properties in washing and during bleaching process.
- Compatible with anionic and non-ionic compounds, not compatible with cationic products.
- Biodegradable.
- Foaming product.
- Prevents lime-soap precipitations in hard water.

#### **Amount to be used :**

**Lipol 610** can be diluted with cold or warm water at a concentration of 1 – 2 gm/L.

#### **Storage :**

**Lipol 610** is stable for 1 year when properly stored in closed containers at 20°C. Avoid direct sunlight and elevated temperatures.
