

Zytoplast

[PVA free & Bioeliminatable size]

Zytoplast is a new generation Modified Starch compound specially formulated for spun yarn sizing. The product has excellent adhesion to polyester, cotton and rayon fibers & has less than 0.5% synthetic organic polymers

Zytoplast gives excellent lubricity, flexibility and abrasion resistance making it an ideal compound for spun yarn sizing.

Zytoplast being a modified starch is easier to desize with normal enzyme technique.

Features	Benefits
Homogeneous compound	Can be used alone or can be blended with unmodified or modified starch to reduce cost. No dusting.
Lower viscosity	Better wetting and penetration.
New formulation chemistry	Improves strength, reduces loss in Elongation, allows easy opening and lower dropping on looms.
Controlled molecular weight.	Stable viscosity, excellent wetting & Lower retrogradation temperature.
Improved solubility	Easily desized with enzymes.

Specifications:

Appearance	:	Light white colour powder
Solid content	:	93 ± 2%
Solubility	:	Easily soluble in hot water above 85°C
Chemical composition	:	Blend of additives with starch

Application:

The product can be cooked from 8% to 17% concentration depending on sizing requirement. The product can work by itself as a single product for sizing 100% cotton spun yarn, polyester cotton and polyester-rayon blends from 80's count to 30's count. For lower counts (if cost is a consideration) and for slower speed looms, one can blend **Zytoplast** with locally available unmodified or acid modified starch in ratio 67/33 or 50/50 or 33/67 depending on quality of size required.

Desizing:

Desizing of this compound is relatively easy. Standard enzyme technique can be followed for complete removal.

Preparation:

Add-on % of this product should be decided by user taking into consideration gain in strength required maintaining reasonable loss in elongation and surface protection required for controlling hairiness of the final yarn. The optimum % pick-up varies from Mill to Mill and from sort to sort depending on yarn quality and types and speed of the looms used. Most important feature one needs to achieve is correct viscosity / refractometer (% solids for a given sort)

Cooking Procedure:

Take water and add Zytoplast powder to cooking vessel. Stir for 5 - 10 minutes and start the cooking by injecting steam. One can cook in open or closed vessel at atmospheric or high-pressure conditions. The time can vary from 30 minutes to 60 minutes depending on heating profile and final temperature achieved.

The cooked solution is generally stable in viscosity and small drop may be seen over extended storage beyond 2-4 hours. The cooked size solution should be maintained at 85 - 90°C in storage vessel with indirect heating. Concentration should be monitored by refractometer for routine control along with viscosity cup for maintaining % concentration and viscosity at a given temperature.

Complimentary products:

- **Ran 1000:** Acrylic based binder for spun yarn sizing
- **R Cryl:** Acrylic based binder for spun yarn sizing
- **Z 3000 ACP:** polyester resin based binder for spun yarn sizing
- **R Soft 44:** Softener for spun yarn sizing
- **R Soft 55:** Softener for spun yarn sizing

Storage:

- Do not store **Zytoplast** bags above 50°C or in direct sun.
- Stable for 6 months if stored in a shade at room temperature.

Note: Full technical note is available on application of Zytoplast in spun sizing using alone or with additives covering entire spectrum of fabric & variety of looms to produce them.

We recommend that before using our products, the customer should make his own tests to determine the suitability of the products for his own purpose under his operating conditions. As the circumstances under which our products are stored, handled and used are beyond our control, we cannot assume any responsibility for their use by the customers.*

MATERIAL SAFETY DATA SHEET

1. Trade Name: **ZYTOPLAST**

Company:

ZYDEX INDUSTRIES
25A, GANDHI OIL MILL COMPOUND
GORWA
VADODARA-390016, INDIA

Emergency information:

ZYDEX INDUSTRIES
TELEPHONE NO.+91 265 2280865, 2283386 FAX NO.91 265 2280872

2. **Composition/information on ingredients:**

Chemical nature: **Modified Starch** mixed with additives.

3. **Possible hazards**

Critical hazards to man and the environment: Non-Hazardous

4. **First aid measures:**

General advice:	Remove contaminated clothing
If inhaled:	Keep patient calm, remove to fresh air
On skin contact:	Wash thoroughly with soap and water
On contact with eyes:	Wash affected eyes for at least 15 minutes under running water with eyelids help open, consult an eye specialist.
On ingestion:	Rinse mouth and then drink plenty of water

5. **Fire fighting measures:**

Suitable extinguishing media:	Water spray, dry extinguishing media, foam, carbon di-oxide (CO ₂) Non-flammable and hence no fire hazard.
-------------------------------	--

6. Accidental release measures:

Personal precautions:	No special measures necessary
Environmental precautions:	Do not let product enter drains
Methods for clearing up:	Contain with absorbent material and dispose. Clean with water.

7. Handling and storage

Handling:	Ensure thorough ventilation of stores and work areas
Protection against fire & explosion:	No special measures necessary
Storage:	Keep tightly closed in a dry and cool place.

8. Exposure controls and personal protection

Personal protective equipment	
Respiratory protection:	Avoid breathing vapour
Hand protection:	Protective gloves
Eye protection:	Goggles
General safety and hygiene measures:	The usual precautions for the handling Of chemicals must be observed.

9. Physical and chemical properties

Form	:	Powder
Colour	:	Creamish White
Solid content	:	93 ± 2%
Flash point	:	>100°C
Ignition temperature:	:	>200°C
Explosion hazard	:	No explosion hazard
Vapour pressure	:	N/A
Solubility	:	Soluble in hot water above 85°C
pH value	:	Approx. 6.5 – 7.0
(at 10% conc in water when cooked)		

10. **Stability and reactivity**

Storage time: 6 months

Hazardous reactions: None provided product is correctly processed

11. **Toxicological information:** NON-TOXIC

12. **Ecological information:**

General Notes:

Do not allow material to be released to the environment without proper governmental permits.

13. **Disposal consideration:**

Product : Must be dumped or incinerated in accordance with local regulations

Contaminated packaging: Uncontaminated packs can be re-used. Packs that cannot be cleaned should be disposed of in the same manner as the contents.

14. **Transport Information:** Not a hazardous material for transportation.

DOT regulations

Hazard class : Not regulated.

Land transport ADR/RID (Cross-border)
ADR/RID Class : Not regulated.

Maritime transport IMDG:
IMDG Class : Not regulated.

Air transport ICAO-TI and IATA-DGR:
ICAO/IATA Class : Not regulated.

Transport/Additional information : Not dangerous according to the above specifications.

15. **Regulations**

Product related hazard information:

*Hazard symbols: Non-hazardous

*Safety phrases:

26 In case of contact with eyes, rinse immediately with plenty of water
& seek medical advice.

16. **Other Information**

Employers should use this information only as a supplement to other information gathered by them, and should make independent judgement of suitability of the information to ensure proper use and protect the health and safety of employees. This information is furnished without warranty, and any use of the product conformance with this Material Safety Data Sheet, or in combination with any product or process, is the responsibility of the user.
